PROFESSIONAL SUMMARY

Mechatronics Engineer specialized in industrial automation and PLC programming, with hands-on experience in production line maintenance, control panel wiring, and smart systems integration. Skilled in Flutter mobile development and passionate about combining software with automation to improve manufacturing efficiency.

CORE COMPETENCIES

PLC Programming (Ladder Logic), Industrial Automation, Production Line Maintenance, Control Panel Wiring & Installation, Smart Home Systems, Flutter Development, MATLAB, SOLIDWORKS / CAD, MySQL, PHP, Microsoft Office, Adobe Programs

WORK EXPERIENCE

Nageh Tex Factory

10th of Ramadan, Egypt | Nov 2025 – Present

Maintenance Manager / Production & Maintenance Engineer

- Oversee full operation of a velvet raising production line consisting of 15 industrial machines
- Manage daily production workflow and ensure minimal downtime
- Handle all electrical and mechanical maintenance, troubleshooting, and preventive maintenance programs
- Optimize machine performance and supervise operators and technicians

TR. Tesla Company

New Minia, Egypt | 2023 – Nov 2025

Mechatronics Engineer

- Started as a trainee before graduation, then hired full-time
- Maintained and troubleshooted production lines
- Installed and wired control panels, programmed PLCs (Ladder Logic)
- Set up capacitor banks for power-factor correction
- Integrated mobile applications with production systems using Flutter for improved monitoring and automation

Xzone-EG / Freelance

Egypt | 2022 – Present

Flutter Mobile Application Developer

- Developed cross-platform mobile applications using Flutter and Dart
- Designed user-friendly interfaces and optimized app performance
- Collaborated with clients to deliver customized software solutions

CASA for Smart Solutions

Minia, Egypt | 2020 – 2022

Smart Home Engineer & Installation Supervisor

- Installed and configured smart home systems including automation controllers, sensors, and lighting
- Supervised on-site installations and ensured integration of control panels and network components

EDUCATION

Bachelor of Engineering – Mechatronics and Industrial Robotics | 2025

Minia University, Egypt

GPA: 3.0/4.0 – Very Good | Graduation Project: Excellent (A)

PROJECTS

- **Smart Glass for the Visually Impaired:** Contributed to Python code for smart glasses providing assistance via sensors and audio feedback. Graduation project — Grade: Excellent (A).
- **Line Follower Robot:** Developed a mobile robot with infrared sensors for path following. Focused on control logic and path stability. First place winner.
- **Smart Voting Machine:** Designed and coded a fingerprint-based electronic voting system with secure authentication.

CERTIFICATIONS

- PLC Programming – HA Consulting Group, Cairo
- Electric Motor & Drive Programming – HA Consulting Group, Cairo
- Classic Control – HA Consulting Group, Cairo
- Smart Home & Automation Systems – ETA ACADEMY, Cairo
- MV Premolded Cable Training – Elsewedy Electric

TECHNICAL SKILLS

Automation: Classic Control, PLC (Ladder Logic), SCADA

Software: MATLAB, SOLIDWORKS, Flutter, PHP, MySQL

Languages: Arabic (Native), English (Very Good)
