ABOUT ME

Mechatronics Engineer specialized in industrial automation and mobile application development, with hands-on experience in PLC programming, production line maintenance, and smart systems integration. Skilled in Flutter development and passionate about combining software with automation to improve efficiency and smart manufacturing solutions.

WORK EXPERIENCE

- **Production & Maintenance Engineer for production line**

- Nageh Tex Factory | The third industrial zone, 10th of Ramadan | 11.2025 – Present**

As the Maintenance Manager, I oversee the full operation of a velvet raising production line consisting of 15 industrial machines. I manage daily production workflow, ensure minimal downtime, and handle all electrical and mechanical maintenance. My role includes troubleshooting, implementing preventive maintenance programs, optimizing machine performance, and supervising operators and technicians while maintaining high safety and quality standards.

- **Mechatronics Engineer**

- TR. Tesla Company | New Minia, Egypt | 2023 – 11.2025**

Initially joined as a trainee before graduation and was later hired full-time. Responsible for maintaining and troubleshooting production lines, installing and wiring control panels, programming PLCs, and setting up capacitor banks for power-factor correction. Currently working on integrating mobile applications with production systems using my Flutter development skills to improve monitoring and automation efficiency.

- **Flutter Mobile Application Developer**

- Xzone-EG | 2022 – 2023**

- Freelance | 2023 – Present**

Developed and maintained cross-platform mobile applications using Flutter. Designed user-friendly interfaces, optimized app performance, and collaborated with clients to deliver customized solutions for various business needs.

- **Smart Home Engineer & Installation Supervisor**

- CASA for smart solutions | 2020 – 2022 | Minia, Egypt**

Installed and configured smart home systems, including automation controllers, sensors, and lighting systems. Supervised on-site installations and ensured smooth integration of control panels and network components.

EDUCATION

Bachelor of Engineering – Mechatronics and Industrial Robotics Department, Minia University, Egypt (June 2025)

- GPA: 3.0 out of 4.0 – Very Good
 - Graduation project grade: Excellent (A)
-

TECHNICAL SKILLS

- Classic Control Systems
 - MATLAB
 - Flutter Programming
 - MySQL Database Design & Programming
 - Proficient in Microsoft Office Programs
 - PLC Programming (Ladder Logic)
 - SOLIDWORKS- CAD design
 - PHP Programming
 - Proficient in Adobe Programs
-

COURSES AND ACHIEVEMENTS

- Control Fundamentals and PLC Basics – HA Group - Cairo
 - Smart home course - ETA academy - Cairo
 - Training course - MV premolded cable - Elsewedy Electric
 - Won first place in the Line Follower Competition from the Chinese University of Technology in Beni Suef
 - Volunteer in “future generation” in the Jesuit and Frere Association
 - Volunteer in Egyptian Red Crescent
 - Volunteer in “Life Together” for the rehabilitation and integration of people
 - Volunteer in Dar Jan Nuweiba Farm
-

EDUCATIONAL PROJECTS

- **Smart Glass for the Visually Impaired:** Contributed significantly to the Python code of a smart glasses graduation project that provides assistance to visually impaired users using sensors and audio feedback.
 - **Line Follower Robot:** Developed a mobile robot capable of following a predefined line path using infrared sensors, focusing on control logic and path stability.
 - **Smart Voting Machine:** Participated in the design and coding of a fingerprint-based electronic voting system, integrating secure authentication and user interface elements.
-

ADDITIONAL INFORMATION

- **Languages:**
 - Arabic (Native)
 - English: (very good)
- **Certifications:**
 - PLC Programming – HA Consulting Group - Cairo
 - Electric Motor & Drive Programming – HA Consulting Group - Cairo
 - Classic Control – HA Consulting Group - Cairo
 - Smart Home & Automation Systems - ETA ACADEMY - Cairo
